

PIX4Dcloud

The online platform for ground and drone mapping, progress tracking, and site documentation

Professional photogrammetry on the cloud

Accurate results

Rely on Pix4D's processing algorithms to get survey-grade results from images. Choose the AutoGCPs feature for even greater accuracy.

Analysis made easy

Get an instant view of any jobsite from anywhere, on your browser, in 2D and 3D, with results you can measure, explore, compare, share, and collaborate on.

Up-to-date documentation

Keep a permanent visual archive of your jobsite. Resolve disputes with stakeholders and clients more efficiently.

Map, measure, and document the progress of your site

Range of outputs

3D point cloud
.las

3D textured mesh
.fbx, .obj

Orthomosaic
GeoTiff (.tif)

Digital Surface Model (DSM)
GeoTiff (.tif)

With a variety of tools

Measure, annotate and share
Measure distances, highlight critical elements, and share data with your team, clients, or stakeholders

Overlay design plans and maps
Compare the as-built with the as-designed to instantly verify schedules and site progress

Compare maps and 3D models over time
Compare different different days to spot what has changed in 2D and 3D.

Choose the right solution for your needs

PIX4Dcloud

- Create accurate 2D maps and 3D models from images
- Measure distances, areas, and volumes
- Add / Import annotations
- Export annotations to CAD / GIS
- Generate elevation profiles
- Perform virtual inspections
- Share with team and stakeholders
- Mission Planner tool
- Transfer data to Trimble Connect

PIX4Dcloud Advanced

All PIX4Dcloud features, plus:

- Track and document site progress with visual Timeline
- Increase accuracy with AutoGCPs
- Compare volumes over time
- Overlay design plans and maps
- 2D / 3D compare view to see what has changed
- Annotations report (PDF)
- IFC visualization support

Enterprise

PIX4Dcloud or PIX4Dcloud Advanced interface and features, plus:

- PIX4Dengine Cloud API access
- Custom integration
- Custom storage
- Pay per use
